Turning wasted methane into *Bitcoin* — and a €15M EU partnership.

An executive brief on the European funding strategy for Stranded Value — the open-source platform that converts stranded natural gas into clean electricity and energy-backed Bitcoin.

€95.5B
Horizon Europe pool, Canada eligible as associated

€15M
target innovation-action grant (higher-TRL)

10k+
tonnes CO_2e avoided per year at scale

2027
EU methane import rule creates the tailwind

EXECUTIVE SUMMARY

The opportunity, and the ask

THE PLATFORM

Stranded Value turns flared, venting methane — an 84× more potent greenhouse gas than CO_2 — into clean electricity and energy-backed Bitcoin. Using **real, verified government emissions data** across 2,611 Canadian well-sites, it models generator sizing, ASIC mining ROI and financing to make otherwise uneconomic gas **actionable and verifiable**.

Methane capture here is not a green gesture — it is a *profitable, auditable, climate-positive asset*.

THE FUNDING ASK

Seek a Horizon Europe Pillar II · Cluster 5 grant (€2.5M–€15M) by forming a cross-Canada–EU research consortium with Europe's leading applied energy institutes.

Board actions sought:

- Approve Tier-1 partner outreach (TNO · Fraunhofer · SINTEF)
- Fund proposal prep + coordination

€95.5B	€10.1B	€2.5M–15M	100%
EU programme budget	Climate · Energy · Mobility cluster	grant size range	direct costs + 25% flat indirect

VERIFIED EMISSIONS DATA · OPEN-SOURCE METHODOLOGY · LIVE BTC-PRICED ROI · PORTFOLIO SIMULATION · EU METHANE REGULATION ALIGNED

THE FUNDING LANDSCAPE

One dead end, four live roads

Our first instinct — the **Canada–EU trade agreement (CETA)** — is ruled out as a funding vehicle: it is not fully ratified by all EU member states and it only removes trade barriers; it carries **no mandate for public funding instruments**. The real money sits in the four instruments below.

1 · HORIZON EUROPE

PRIMARY

€95.5B

Canada is an **associated country** — eligible for the same conditions as EU entities. Grants €2.5M → €15M, Cluster 5 (€10.1B). The strategic anchor of this plan.

2 · EU–CANADA GREEN ALLIANCE

DIPLOMATIC ANCHOR

Signed **November 2023** — collaborative research, clean energy and climate action. Not a fund itself, but the **political cover** that strengthens the Horizon Europe application (letters of support, partner intros).

3 · INNOVATION FUND CANADA

DOMESTIC CO-FINANCE

$3.1B CAD

CCS and industrial decarbonization. Stranded methane capture aligns with its carbon-reduction mandate — a natural **co-financing** match once EU funds anchor.

4 · EUROPEAN INVESTMENT BANK

POST-PILOT LENDING

€1.4B

Committed to Canadian clean-energy projects. Market-rate lending (not grants) — best used to **scale to commercial** after a Horizon Europe grant is secured.

Strategy in one line: use the Green Alliance as the diplomatic bridge to win a **Horizon Europe** grant, add **Innovation Fund Canada** as domestic co-finance, and unlock **EIB** lending to take the fleet from pilot to commercial scale.

HORIZON EUROPE · THE MECHANICS

A programme built for us

WHY CANADA WINS

- **Associated-country status** — Canadian partners apply under the same conditions as EU entities, no special disadvantage.
- **Pillar II · Cluster 5** (Climate, Energy & Mobility) is the single largest slice at **€10.1B**, exactly our lane.
- **Cost model**: 100% of direct costs + a flat 25% indirect rate — high coverage, low co-funding burden.
- **TRL 5–8** (pilot → demonstration) matches our current phase of development.

CONSORTIUM RULE

3+

partners from **3+ EU/EEA countries** required. Canada counts as an associated country, so we can **lead as the Canadian entity**.

A proposal with 4 countries (CA + NL + DE + NO) comfortably clears the bar and earns evaluators' geographic-breadth marks.

PROPOSED TIMELINE & TRL ROADMAP

PHASE	TRL	DURATION	DESCRIPTION
Research	TRL 4	12 months	Lab validation of integrated methane → power → Bitcoin system
Pilot	TRL 6	18 months	Field deployment at 1–3 Canadian well-sites
Regional	TRL 8	12 months	Scaled deployment across 10+ sites in one province
Commercial	TRL 9	6 months	Full commercial rollout + open replication toolkit

CONSORTIUM · BUDGET

The team to win it

LEAD

Stranded Value

Canada (CA)

Industry · coordinator & lead applicant

RESEARCH CO-LEAD

TNO

Netherlands (NL)

CCS & energy-transition research institute

TECHNICAL

Fraunhofer UMSICHT

Germany (DE)

Gas-to-energy & circular systems

ENERGY SYSTEMS

SINTEF

Norway (NO)

Gas, flaring & energy-recovery expertise

4 countries (CA·NL·DE·NO) — minimum satisfied. **Optional reinforcement:** RISE (Sweden) or VTT (Finland) add geographic breadth and evaluator marks.

REGULATORY TAILWIND — EU METHANE RULE

From **2027**, EU gas importers must verify the methane intensity of Canadian supplies. Stranded Value's open-source **measure → monitor → reduce** methodology becomes a **compliance tool** for Canadian producers exporting to the EU.

"We are building the measurement and reduction tooling that EU methane import regulations demand from Canadian gas producers by 2027."

€15M BUDGET MODEL

Personnel	€9M · 60%
Equipment	€3M · 20%
Travel / coordination	€1.5M · 10%
Indirect costs	€1.5M · 10%

IMPACT · NEXT STEPS

The value we return

10,000+
tonnes of CO_2e avoided per year from stranded-gas capture

€5–8M
annualized value from energy-backed Bitcoin at target scale

Indig.
direct clean-energy jobs + Indigenous community consultation & benefit sharing

Open
open-source methodology replicable for stranded energy worldwide

THE ROAD AHEAD

1

Outreach

Contact TNO, Fraunhofer & SINTEF. Register on the Enterprise Europe Network partner-matching portal.

2

Proposal

Draft the Pillar II · Cluster 5 application targeting the Feb/Mar deadline.

3

Endorse

Engage the EU Delegation to Canada via the Green Alliance for letters of support.

"Refuse the gas. Keep the value. Show every sat."

DECISION SOUGHT

Approve the €15M Horizon Europe pursuit & outreach.

This briefing is for presentation to a funding board. Research verified 2026-09-21. Safe Harbour: informational purposes only; not legal, financial or investment advice.
